

	ISO 14001:2015	IMP 5.2_1
	ENVIRONMENTAL POLICY	V.01
		Jun-22

ARANOW's environmental policy is based on the commitment of the Company in not to waste resources of any origin, its proper management and conservation, giving special attention to natural resources and also meeting the environmentally-wise needs of our customers, offering always a commitment to highest responsibility in all our activities and assuring the compliance of standing environmental legislation.

To achieve these purposes, a special attention is given to:

- Treating customers' requirements in a personalized way, giving alternatives and solutions to their demands, prioritizing those that favour the reduction of energy expenditure.
- Always meet environmental requirements established by the legal regulations of our industry on both European and international scope.
- To design processes to reduce the environmental impact of their activity and assess in advance the aforementioned environmental impact of new activities or services.
- Minimize consumption of natural resources, emissions and waste production, as well as prevent accidental releases of substances or energy.
- The Staff of ARANOW and its partners are particularly sensitive in the preservation of the environment, the minimization of waste production and the consumption of natural resources.
- Communicate the goals and criteria established by ARANOW's Environment Policy to all our structure.
- Inform about our environmental policy to all persons working for the organization or persons who work on its behalf and to our main suppliers.
- Carry out reviews of the results in order to identify opportunities for continuous improvement at the environmental surroundings of our activities.

Polinyà, June 29th, 2022.

Jan Molina.
CEO
